

```
ls -l --time-style=+ /dev/disk/by-id/
ls -l --time-style=+ /dev/disk/by-label/
umount /dev/sdxx
umount /mountpoint
```

ioping

```
ioping
sudo ioping /dev/sda
```

mount

```
mount | grep /dev/sd
mount(8)
```

non-optical

```
blockid -h # --help
df -h /mnt/*
df -h [<disk>]
du -sh [<bigDirectory>]
```

burn ISO image

1. (optional) sudo wipefs [-a] /dev/sdx wipes signatures
2. burn: sudo pv image.iso -Yo /dev/sdx with nice progress line, but doesn't report bytes
3. check: dd if=/dev/sdg | cmp 'image.iso' shouldn't see "dd: error reading..."

permissions

-----	0000	no permissions
---x---x--x	0111	execute
--w--w--w-	0222	write
--wx-wx-wx	0333	write & execute
-r--r--r--	0444	read
-r-xr-xr-x	0555	read & execute
-rw-rw-rw-	0666	read & write
-rwxrwxrwx	0777	read, write, & execute

fsck

fsck manages lost+found directory

e2fsck

```
sudo e2fsck -pv /dev/sdx1 # p = automatic, or just hit enter at each question
e2fsck(8)
```

lsblk

```
lsblk -f # --fs - filesystems
lsblk -h # --help
lsblk -l # --list - removes tree structure glyphs
lsblk -p # --paths - of devices
lsblk -V # --version
```

lsblk(8)

partitions

```
sudo exfatlabel /dev/sdxx <new_label>
sudo mkfs.exfat -n <label> /dev/sdxx
sudo mkfs.ext4 -L <label> /dev/sdxx
```

FAT

```
sudo fatlabel /dev/sdi1 [<newLabel>]
sudo mkfs.vfat -n 'label' -I /dev/sdxn
```

gdisk

```
sudo gdisk /dev/sdx
sudo gdisk -l /dev/sda
```

gdisk(8)

GParted

- can't set the volume-name
- GNU Parted User Manual
- parted(8)

interactive mode

```
sudo parted /dev/sdg
```

commands

- mklabel <label> destroys existing partitions
- p (= print)
- q (= quit)

script mode

```
sudo parted -l | grep sdg -B 1 -A 6 # --list
sudo parted /dev/sda -s mklabel msdos mkpart primary 0% 100% # also creates an MBR
sudo parted /dev/sdg p # quick print of device info

-s (--script) never prompts for user intervention
```

Trash

```
du -hs ~/.local/share/Trash
rm -rf ~/.local/share/Trash
```

trash-cli

```
$OSL/bashrc-console-fm
trash-empty # lists before query
trash-put
```

optical

```
cd-drive # info
growisofs -dvd-compat -speed=n -Z /dev/sr0=image.iso # n x 1385 KB/s
```

cdrtools - cdrecord

```
cdrecord dev=/dev/sr0 -checkdrive # Vendor_info etc
cdrecord -v -sao dev=/dev/sr0 linux.iso
```

- -sao Session At Once, good for data
- -v verbose

cdrtools - mkisofs

```
mkisofs -V 'max32charVolName' -J -r -o <file.iso> <directory>
```

```
-r = -rational-rock
```

tray

```
eject # opens tray
```

```
eject -h
```

```
eject -t # closes tray (might fail)
```

```
eject -T # toggles tray
```

Whipper

```
whipper -h
```

```
whipper cd rip
```

```
whipper drive list
```

```
~/.config/whipper/whipper.conf
```
